

TWIN LAKES WATERSHED TARGET AREA PROJECT

LOWER PLATTE SOUTH
natural resources district

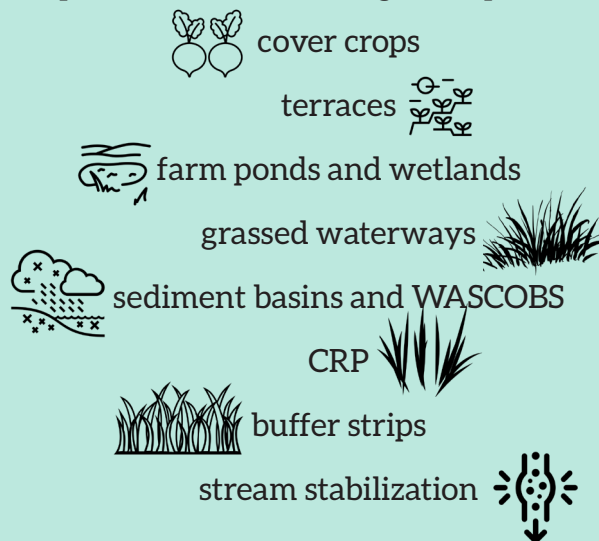

What are we doing?

The Lower Platte South NRD (LPSNRD) is partnering with USDA Natural Resources Conservation Service and the Nebraska Department of Environment and Energy on a three-year effort to improve water quality in the Twin Lakes Watershed, with funding from the Section 319 Program.

What can you do?

We're offering enhanced cost-share incentives to producers for installing these practices:

These practices will help control erosion and keep nitrogen, phosphorus and sediment out of lakes and waterways, giving us all healthier lakes and better recreation opportunities within the watershed.

Cost-share icons courtesy of the Noun Project; Made, Yu luck, Valerie Lamm, Jhonatan, Francesca Ameglio, Francesco Zaccaria, Lina, and Stephan Plaster.

How do you get started?

- Work with your NRCS field office to plan your conservation project
- Your NRCS office will then contact LPSNRD to determine how your project fits with our watershed goals
- Submit your cost-share application to LPSNRD through your NRCS office
- For more information contact the Lower Platte South NRD, (402) 476-2729 or visit LPSNRD.org

The Lower Platte South Natural Resources District is an equal opportunity provider and employer.
